

The Amsterdam Brain & Cognition centre and its co-organisers proudly present the Symposium 2017 “Crossing the Watershed between Sleep and Wakefulness: Information processing during sleep, wakefulness and alternative states of consciousness”. The event will take place on **June 30th**, 2017, in Amsterdam.

The [symposium](#) will focus on recent advances regarding processing during sleep and intermediary sleep-wake states, considering work at both the neural systems and behavioural levels. Besides **lectures from experts in this field**, a **poster session** will be part of the programme. In addition, the symposium of 2017 will include a lecture from the **Visiting Honorary Chair in Cognitive Science**. The Honorary Chair of this year has been awarded to Prof. Dr. Jerome Siegel, a prominent and leading sleep researcher.

The symposium has been organised in association to the [Amsterdam Brain and Cognition Summer School](#), which will take place in the two weeks prior to the symposium. The topic of this year’s summer school is: “The Sleeping Brain: From Neuronal Networks to Cognition.” During the Summer School, promising neuroscience master students will learn the fundamentals of- and latest developments in sleep research, through Master Classes given by renowned researchers in the field, tutor-guided projects and workshops.

Registration for the symposium is possible via our [online form](#). **Abstracts for poster presentations** can be uploaded via the standard [registration form](#) as well (maximum of 150 words, excluding titles and references), **deadline for abstract submission, May 1st**. For any question you might have about the symposium and the potential topic of your poster, please contact us (summerschool-iis@uva.nl).

We sincerely look forward to meeting you in Amsterdam!
