ISMC 2016 provides comprehensive training in all aspects of sleep medicine. The course offers an extensive programme of talks, workshops and plenary sessions, with a dual-track format allowing delegates to choose sessions most appropriate to their own personal learning and practice.

Based on the syllabus of the ESRS Somnologist and Somnologist-Technologist exams, ISMC 2016 is an excellent revision opportunity.

All delegates will receive a copy of the ESRS Sleep Medicine Textbook free of charge, and a practice exam will be offered on the final day.

The ISMC 2016 will be held from Monday 6th June until Thursday 9th June at the Radisson Blu in Cardiff, Wales. Based within the capital city of Wales, the Radisson Blu is also less than 2km from Cardiff Castle and Cardiff Bay and with transport links on your doorstep it is in the perfect position for some cultural adventure as well.
